

# Ultrafabrics Environmental Eco Scorecard

## Our Product

We've reached our sustainable material goal a full year ahead of our 2025 target. All Ultrafabrics branded collections now include at least 50% rapidly renewable and/or recycled content.

We've outlined sustainable specifications intrinsic to our materials:

- Low VOCs promote healthier indoor air quality
- SCS Indoor Advantage Gold certification
- Do not contain Red List Chemicals<sup>††</sup>
- REACH compliant
- Over 98% of solvents recaptured and recycled
- Includes sustainable materials like TENCEL™ Modal fibers, REPREVE® recycled polyester, LENZING™ ECOVERO™ viscose, and Susterra® propanedioal, a bio-based resin  
(Exact composition varies by collection.)
- EPA-registered agents  
(antimicrobial, antibacterial, and anti-mildew)

## Our Purpose

We believe there is beauty in balance, and you should never compromise on performance, comfort, or sustainability. It's this perspective that has inspired our work since our inception in 1999.

We do not add:

- Bisphenol A (BPA)<sup>†</sup>
- Conflict Minerals
- Flame Retardants
- Heavy Metal Stabilizers
- Formaldehyde
- PFAS\*/PFOA
- Plasticizer Phthalates
- POPs (Persistent Organic Pollutants)
- PVC (Polyvinyl Chloride)

For more information about our sustainability journey, [view our website](#).

\*Excludes Reef Pro, Ultraleather® Pro, and select custom collections.

\*\*Please note that the information, certifications, goals, and progress shared does not apply to Uf Select.

†† Excludes Ultraleather Pro, Reef Pro, and collections suitable for outdoor.

† In line with our commitment to sustainable material innovation, we have chosen to incorporate recycled polyester fibers in select collections. Due to the recycling process of the plastic bottles, there is a slight possibility of trace amounts of BPAs being present in collections with the 65% recycled polyester/35% rayon backcloth.
