

Cutting-edge Comfort at Home

The Future of Comfort

Ultrafabrics creates materials for tomorrow. Uniting craftsmanship with purposeful innovation, we design the most comfortable and uniquely sensorial upholstery materials engineered for performance.

At Home, Comfort Reigns Supreme

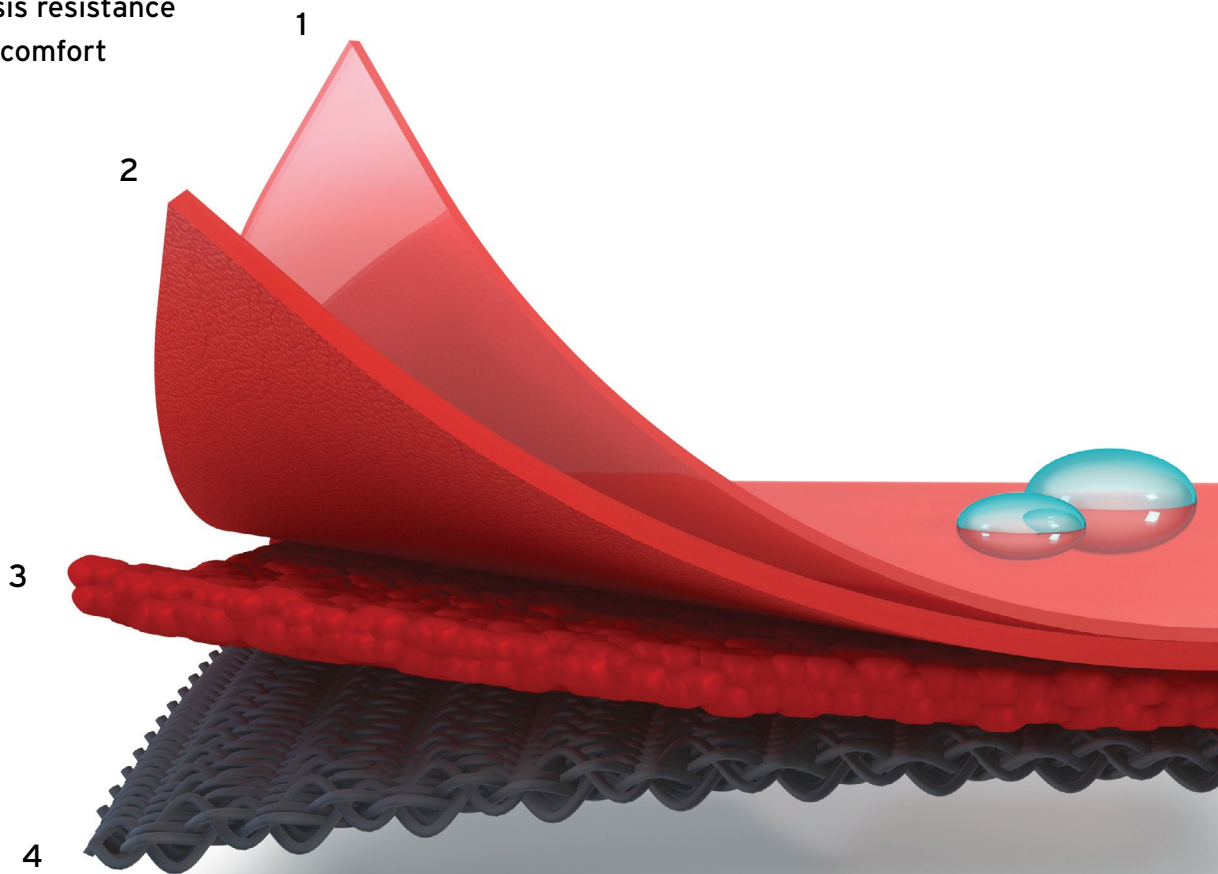

Our curated range of textures create softer surroundings and provide a sense of calm, all while representing the concept of eco-luxury.

Crafted Intelligence

Five decades of Japanese craftsmanship is embedded in every Ultrafabrics material. Our proprietary Takumi™ Technology reflects the hands-on process in which our products are developed, from concept to application.

- 01 Premium polycarbonate construction
- 02 Featured collections achieve 16 weeks hydrolysis resistance
- 03 Inherent thermal comfort

Elevate Your Vision

With a selection of sumptuous and functional materials, Ultrafabrics are thoughtfully created to complement your home.

The Only Fabric That Breathes

Designed with a ventilation system that enhances softness and promotes air circulation, our selection of Breathable Comfort materials regulates body temperature for the highest level of seating comfort.

Brisa | Brisa Distressed | Fresco

- 02** Unmatched comfort
- 03** Array of textures and colors

Our Sustainable Future

Ultrafabrics are forward-thinking materials that are always animal-free and manufactured responsibly with people and planet in mind. With low VOCs and free of toxic products, our fabrics are safe for everyone at home, so you can breathe easily.

- 01 Reach Compliant
- 02 Indoor Advantage Gold Certified
- 03 Japanese mill is ISO 14001 certified
- 04 Free of PFOA, PVC, plasticizers, flame retardants, and formaldehyde

Material Innovation

We're shaping the future of high-tech performance materials, where sustainability is built-in. Beauty, performance, comfort, sustainability - there's no need to compromise.

Volar Bio

Proudly touting a 29% USDA BioPreferred Program Label, Volar Bio includes renewable materials, reducing our dependence on finite resources.

TENCEL™ Modal Fibers

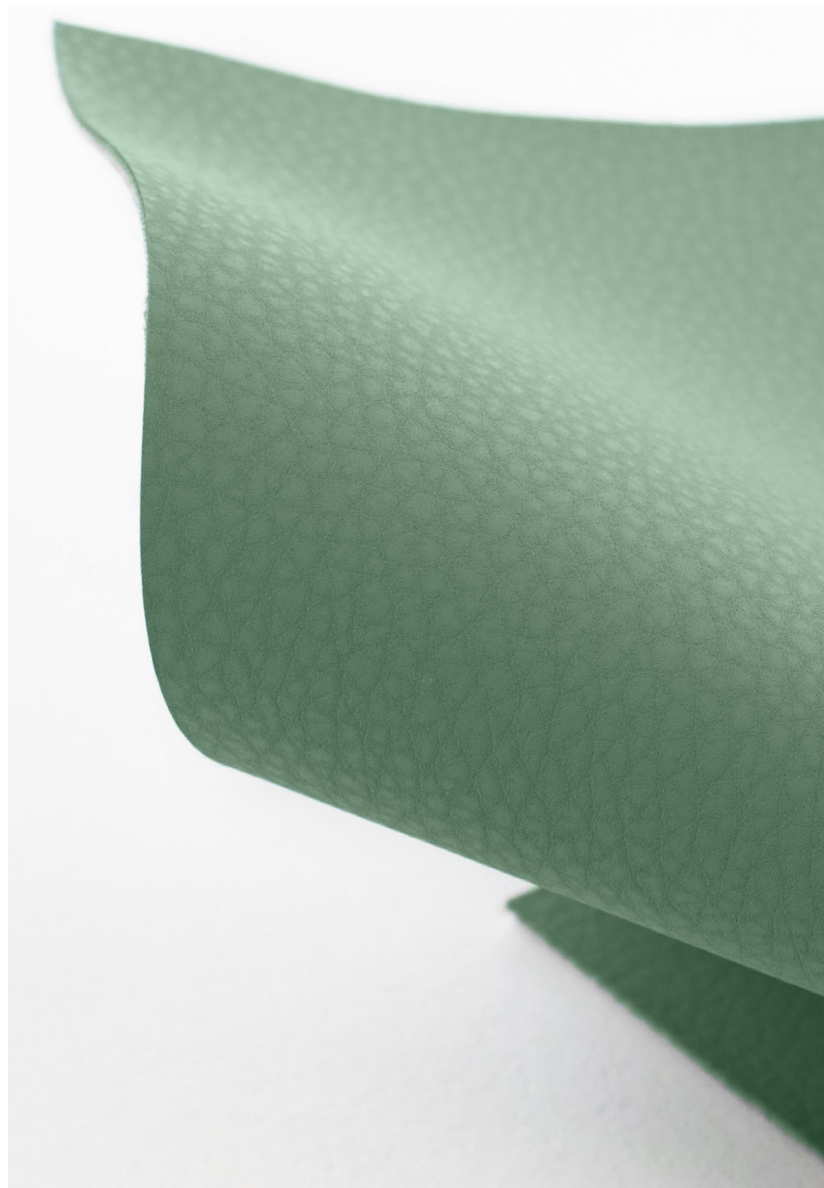

Ultrafabrics is the first and only polyurethane material to incorporate TENCEL™ Modal fibers in 30% of our portfolio.

Sustainable & Recycled Yarns

Throughout 2023 we will update 70% of Ultrafabrics brand products to contain recycled polyester and sustainable rayon fibers.

Every yard with this blended backcloth will contain 8 recycled plastic bottles.

TENCEL™ is a trademark of Lenzing AG

Design Without Limits

From barstools and dining chairs to headboards or loveseats, Ultrafabrics provides the flexibility you need for today's home.

Indoor Style with Outdoor Performance

Designed with the effects of Mother Nature in mind, select materials are engineered to provide lasting beauty and performance, no matter the season or forecast.

- 01 Withstands fading
- 02 UV solar endurance
- 03 Moisture and mildew resistant

Worry-free Performance

Ultrafabrics are engineered for maximum durability and minimum maintenance, providing one less thing for you to worry about.

Our materials feature inherent benefits like:

- 01** Ease of care
- 02** Stain resistance
- 03** Bleach cleanability

Select collections are designed to resist the toughest stains like ketchup, mustard, and denim dyes, with added protection proven to unite repellency and cleanability.

Preferred Cleaners and Disinfectants

One of the best ways to keep Ultrafabrics looking great and germ-free is through proper maintenance and regular cleaning to prevent excessive dirt from accumulating.

Below is a list of cleaners and disinfectants that have been tested on Ultrafabrics materials with passing results when cleaning guidelines are followed as directed*:

- | | |
|---|---|
| 01 Soap and water | 05 Formula 409® |
| 02 1:5 household bleach:water solution | 06 Lysol® Disinfecting Wipes |
| 03 Clorox® Disinfecting Wipes | 07 Isopropyl/Rubbing alcohol (70%) |
| 04 Fantastik® | |

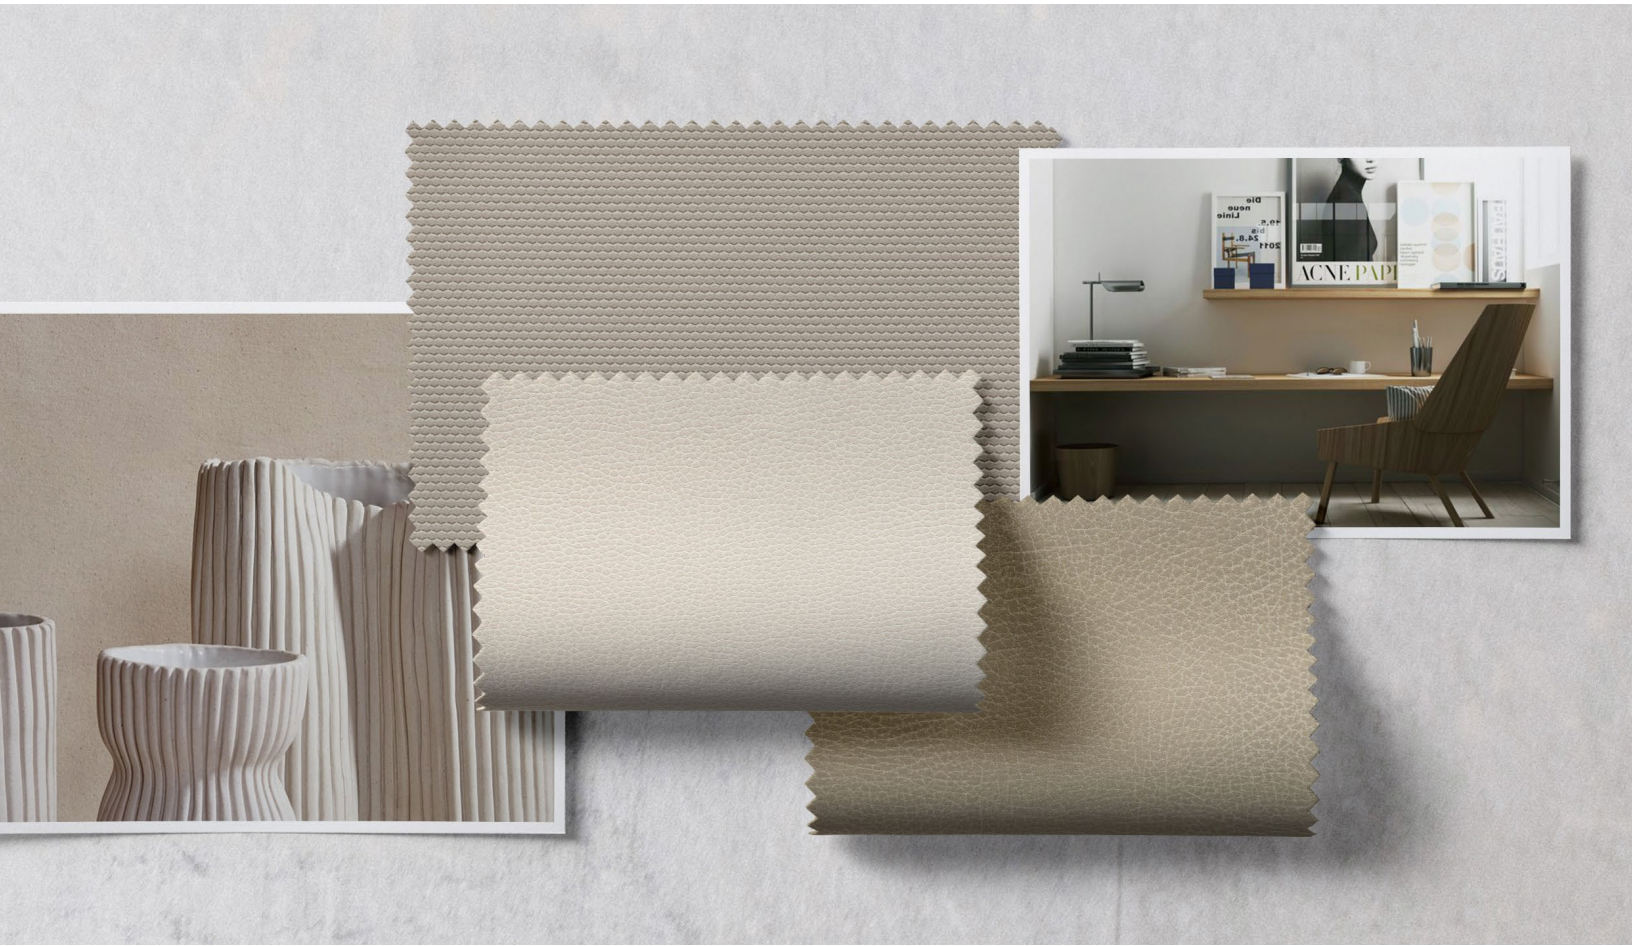

*Do not saturate/soak material with cleaner/disinfectant. Rinse with clean water after exposure to eliminate residue. This recommendation will prolong the life of various furniture components (thread, seam, foam, etc.) that can potentially be impacted by cleaner/disinfectant residue.

Warning: this information is not a guarantee. Please use all cleaning and disinfecting agents safely and as instructed. The use of other cleaning agents, disinfectants, conditioners, or protectants can degrade fabric performance and may void Ultrafabrics warranty.
